

It is my understanding that the Wisconsin No Call list is being threatened by various banks. I have been on the No Call list for several years now and appreciate not being hassled by various businesses and telmarketers. I have no interest in being solicited by a bank or other business and before the no call list, I simply would hang up to save my time. It is incredulous that I should not have my wishes granted to not be bothered by such organizations. Please realize that we have no interest in any of these offers and we will pursue any interest on our own. We do not wish to be harrassed.
